

This Month's Silver Apple Award Goes To...

This May our Silver Apple Award goes to Foster Jacobs! Foster is our dishwasher at Longmeadow High School, but he is way more than that. He works exceptionally hard and he has a great attendance record. He has even peddled his bike through snow to get to work!!

Large capacity walk-in freezers can easily get disorganized when multiple orders come in per week, but not with Foster around. He reorganizes the freezer regularly. He also organizes the dry storage area. This helps all of the other staff, because items are easier to find.

Foster is very conscientious about the physical safety of others, such as the placement of where sharp objects go. He is quick to point out potential issues with the equipment and he is careful not to allow items that could damage the disposal to get into it. He is also very mindful of how everything is done in the kitchen. If someone forgets to get something done, he takes care of it or informs his managers that it was not completed. If items are running low, he writes notes to the head chef about what is running out.

He also gets along with everyone. He is a very kind and thoughtful person. When he communicates, it is apparent that he puts thought into what he has to say. It is always delivered respectfully. We are very lucky to have him as part of our team!!
